

#### The problem

With care, experience, a sophisticated transport and expertise has made it to the sales counter the delicate fresh produce. Now the way to home of the customer should not destroy all this efforts. Especially the warm season or a long way home are the enemy of quality and freshness.

#### The concept

The perfect coordination between packaging equipment and packaging will save the security, quality and freshness- with low cost and innovative- so that the customer gets what he paid: Guaranteed freshness and quality. ... And a good reputation makes a last success!

#### The packaging film

The correct mix of film types, in connection with technically qualified to a unit, add up all the necessary characteristics in a product: High puncture and tear resistance, waterproof, airtight, smell-tight and the highest standards of insulation

#### The hardware

A handy sealing device, adapted to the special film. The base unit is welding and cutting the film safe for transportation. The workflow is hard-coded, so no mistakes can be made by the operator.

#### Flexibility

Whether FS tube-film or FS-bag fast, high-class and inexpensive pampering your customers and with its contemporary packaging and show that "quality and freshness" not just a slogan are. "Image" is as a mosaic and the packaging is an essential part in the picture.

#### Der Vorteil

Der Kunde erhält empfindliche Frischware sicher verpackt für den Heimweg. Perfekt isoliert, geruchssicher und wasserdicht kann sich der Kunde auf FRISCHE-SAFE verlassen. ...und für den ganz heißen Heimweg verträgt es FRISCHE-SAFE auch, wenn der Frischfisch zusammen mit einer Schaufel Scherben-Eis verpackt wird.

Not only fish feels well in FRISCHE-SAFE: keep quality delicatessen, cheese, meat and sausages "counter fresh" on the hottest transport. In online shipping also sensibiles remains well insulated, grease-proof, water-proof and odor-tight to the recipient. High-quality and individually wrapped, but not industrialized in vacuum.
