

Transport safety

Whether as a replacement machine, for demonstration or for the exhibition-stand - with the FS transport aluminum box, the FS-COMFORT is always safe and ready for use- and the return transport is already secured.

Environmentally friendly without packaging waste

- well padded and transport-proof without packaging costs and additional work. In particular at trade fairs or at the customer, the right packaging material is not always available. The FS-transport-alu-box is sufficient for safe packaging.

Flexible with numbers

To prevent unauthorized opening only locks. Optional we can supply locks with number coding - so that only authorized persons can open the box - on the right place and without keys.

On request with TSA Approved Lock: Enables TSA screeners (custom etc) to control and lock the contents without damaging the lock.

Changing system

Your service is fast, professional and cost-effective: If a customer wishes to change a machine, use the FS-transport-box to supply the exchange machine, the customer will change the FS-Comfort simply and will send it back.
